EDUCATION & QUALIFICATIONS

University of Exeter | Bachelor of Science in Computer Science Sep 2023 – Jun 2027 | Exeter, UK

- **Expected grade:** First class
- Key modules: Software Development, Database Theory and Design, Object-oriented programming, Machine Learning, Data structure and Algorithm, Operating System, Discrete Maths, High Performance Computing

INTO Foundation | Foundation Studies Sep 2022 – Jun 2023 | Exeter, UK

- Foundation grade: 1st class, Distinction
- Key modules: Economics and Finance, Mathematics and Statistics, Current Global Issues, Foundation English
- Qualified for £5000 scholarship

WORK EXPERIENCE

Zayo | AI Specialist Intern July 2026 – Sep 2026 | London, United Kingdom

- Processed 10K+ documents across 20+ formats, cutting data preparation time ~10x with a Python/LLM pipeline for classification, OCR, parsing, chunking, and multi-agent extraction
- Enabled 12+ teams to automate enterprise workflows by engineering a production-ready agentic AI system with RAG and persistent memory, using subagents and MCP/tool integrations to retrieve data and execute tasks across Salesforce, Excel, and Power BI

Sophos | Software Engineer Intern Sep 2025 – July 2026 | Oxford, United Kingdom

- Maintained and extended 10+ Java/Spring Boot microservices, raising test coverage to 85% via unit/integration tests and implementing JWT auth that closed 3 session vulnerabilities
- Built production UI features in TypeScript/Angular used daily by 200+ internal employees, backed by RESTful APIs consumed by 6+ downstream services (cutting integration errors 28%)
- Monitored EC2/S3 and managed CI/CD pipelines (Docker, Gradle, Terraform), cutting deployment time 32%

Fremantle | AI Developer Intern Jun 2024 – Sep 2024 | London, United Kingdom

- Built data extraction/analysis pipelines (Python, Excel, Power BI) processing 10,000+ records weekly
- Fine-tuned Audio2Text model (PyTorch, TensorFlow) hitting 98% transcription accuracy; shipped interactive UI for 3 teams
- Deployed LLM workflows via Copilot Studio, cutting manual QA time 39% across testing and monitoring
- Automated email and Excel workflows with Power Automate, saving 15+ hours/week across 4 departments

PROJECTS

Packets.io — Personal Packet Tracer | *Rust, WebAssembly, React* 2026

- Engineered a high-throughput network simulator in Rust, achieving 200+ packets/tick across 100-node topologies by modelling latency, bandwidth constraints, queuing and concurrent packet movement
- Improved packet delivery reliability to 98%+ under simulated network failures and reduced average latency by 30% under congestion by implementing dynamic Dijkstra-based route recalculation and runtime link-failure detection across 10,000+ simulated packets

Nimbus — 1st Place – Hack South West Hackathon | *Go, React, MCP, Claude API* 2025

- Built an AI-driven banking assistant for stablecoin management, extended with 15+ custom MCP tools
- Implemented real-time dashboard synchronisation over WebSockets for low-latency, agent-driven state updates
- Resolved backend write contention in SQLite with mutex locking to handle concurrent tool execution

LEADERSHIP, ACTIVITIES & INTERESTS

ExeAI, University of Exeter | Founder and Head of AI Jan 2025 – June 2025 | Exeter, UK

- Founded ExeAI; grew from 0 to 60+ students across 6 workshops in one semester
- Collaborated with Google Developer Student Club to develop a ML/AI curriculum (neural networks, supervised learning) rated 4.6/5 by attendees

ExeCode, University of Exeter | Workshop Leader Sep 2024 – Dec 2024 | Exeter, UK

- Taught Python to 100+ non-technical students across 10 sessions, hitting 92% satisfaction rate; requested back for 2 follow-up terms
- Maintained MERN stack platform tracking progress for 100+ students
